PRODUCT NEWS

JEEP GLADIATOR 2020-

PART NO: JEV MU20, JEV MU30

CHASSIS CODE: JT

This is the latest step in the Öhlins Racing automotive philosophy – Adventure by Öhlins.

A more than 30 year long tradition of high-end Racing, Rally & Offroad commitments and state-of-the-art solutions within advanced suspension technology is now available for your Jeep Gladiator. The focus has been clear from the very beginning – superior handling & comfort, both on road and off road. The time of compromises is over.

Our suspension gives you better contact with the road, improves sharp turns, and stays stable during hillsides. The two way adjustable damping makes it possible for you to adjust your suspension depending on the road ahead to fit your drive. With more traction and control it's possible to use larger tires for steeper terrain no matter if you're going through muddy water or climbing overland, of course you can lift your vehicle up to +5 inch. The Öhlins suspension will also improve the ride comfort in common roads, which makes these products a perfect match to your vehicle!

GENERAL FEATURES

- > 2.25" shock body, fully aluminium design for improved cooling.
- > PDS – Progressive Damping System, internal hydraulic bump stops for bottoming out control.
- > 2-way adjustable (compression and rebound).
- > Internal check valve system for completely separating compression and rebound adjustment.
- > Öhlins industry leading pressure balanced damping for cavitation prevention.
- > Compatible for 2-5" lift, please see specific part numbers in the table below.
- > Improved top out strength for solid axles and off road use.
- > Spherical ball joints for low friction suspension movement and improved body control.
- > Öhlins custom ball joint seals for long lasting and free play resistance even at dirty use.
- > Rebuildable for custom tuning and PDS stroke.
- > Possible to upgrade to our 2-way adjustable compression valve for adjusting high speed and low speed compression.
- > 2 year limited warranty.

FRONT FEATURES

- > Conventional shock absorber with 3-way swivel high pressure stainless steel braided hose for remote reservoir.
- > Possible to use with 2-5" lifting kit.

REAR FEATURES

- > Conventional shock absorber with piggyback reservoir.
- > Possible to use with 2-5" lifting kit.
- > Rock shields.

PART NO	POSSIBLE LIFT
JEV MU20	2-3**
JEV MU30	3,5-5**
